

Advanced Debriefing Course

Overview

Mater Education and the Center for Medical Simulation (CMS) deliver the four day Advanced Debriefing Course.

Drawing on advanced techniques from experiential learning and organisational psychology and delivered by the CMS, this course focuses on debriefing skills to enhance and extend instructional techniques learnt in the Simulation as a Teaching Tool course.

Participants will run and debrief one of their own scenarios, learn how to use an Action Science technique to reflect on debriefings, and learn how to provide rigorous feedback on debriefings using a structured assessment tool.

2019
26 Feb - 1 Mar

Course structure

The course runs over four full days and includes an online component. Topics covered include:

- debriefing techniques with feedback
- provision of feedback to colleagues on debriefing
- utilisation of Action Science techniques for assessing the quality of debriefing.

To be eligible for this program participants are required to:

- be graduates of the CMS simulation instructor course Simulation as a Teaching Tool, the Comprehensive Simulation Instructor course, or
- submit a recording of a debriefing they have conducted (this will be reviewed by the Institute for Medical Simulation Senior Director who may provide an exemption).

Cost

\$7,000 per person (including GST)
Welcome function, breakfast, lunch, refreshments and dinner included.
