

We specialise in locum roles servicing every state of Australia, in both the public and private hospital setting.

There is a significant amount of locum work at the ICU RMO/registrar level. As such I am looking to build upon an already established fleet of locums in order to service demand from our clients.

Ideally you will have 4 or more weeks of availability, more would be great.

In order to locum with us we will need you to be registered with AHPRA, have a minimum of 1yr experience in ICU. An up to date CV, with at least two current references. In return you will get a tailored service from a dedicated recruitment consultant. Access to roles that never make it to the broader market, coupled with unrivalled hourly rates and payment options.

Below is a snippet of some of the vacancies, if you would like to know more call me direct or email me.
