

Sunnybrook is a fully affiliated teaching hospital of the University of Toronto whose staff includes superb clinician scientists (Gordon Rubinfeld, Rob Fowler, Damon Scales, Niall Adhikari and Taz Sinuff), clinician teachers (Shelly Dev and Dominique Piquette) as well as clinician quality improvers (Andre Amaral).

Our fellowship is about to become Toronto wide through the University of Toronto and will therefore give fellows the opportunity to work in all adult centres around the city and with other renowned Intensivists such as John Marshall, Art Slutsky, Margaret Herridge, Niall Ferguson, Brian Kavanagh and many more.

We have a world class department of critical care, in a world class city for critical care and we believe a world class critical care fellowship for which we are currently recruiting.

Please see the YouTube links below:
