

ITER – Medicine (Paediatric)

General Information

ITER Discipline:	Trainee Names:
Hospital:	Trainee Status:
Term Dates:	Supervisor Name:
Stage of training:	Supervisor Status:
	Days taken to leave:

Description

Intensive care trainees will undertake medical terms at various points in their training, hence will have variable knowledge and clinical skills. It is expected that at the end of the medical term an intensive care trainee will be able to undertake an appropriate assessment and initial management common medical illness problems under indirect / remote supervision, as would be expected for a Basic level medical registrar. The intensive care trainee is not expected to function completely independently or manage complicated medical illness without direct assistance.

Feedback linked to assessment criteria during training is key to assisting trainees to learn and change their performance.

Section 1 of the ITER reflects this longitudinal journey is the ICU trainee for novice to Basic level Acute/Internal Medicine trainee.

Section 2 of the ITER provides feedback on the trainee's performance in relation to their stage of training.

Use the scale below to mark an "X" under the appropriate number that best represents the category:

Novice Training (1 - 10)	Intermediate Training (11 - 15)	ICM Fellow (16 - 20)
---------------------------------	--	-----------------------------

Place the "X" directly on the number corresponding to the appropriate category.

Supervisor Comments:

Global Rating

- Relative to their stage of training, the overall performance of the trainee in this rotation was:
- Has the Trainee made sufficient progress during this term?

Yes

No

If no, please provide comment:

- Should this term be accredited for training:

Yes

No

If no, please provide comment:

- Is there a need to refer the trainee to the College for additional support?

Yes

No

If yes, please provide comment:

- This ITER contains information based on a formal consensus view expressed by the specialist staff at a meeting on

(Example format: 05-Nov-2024)

- Your trainee has not completed a self-assessment. By continuing, they will no longer have this option. Would you like to proceed?

Yes

No
